

Dear Parents and Carers,

At Learn Anything (learnanything.com), we believe AI can meaningfully enhance education — not as a replacement for teachers, but as a powerful, scalable assistant that supports better learning outcomes. Our platform offers several key advantages, all grounded in research and designed for use in real classrooms.

Why Use Learn Anything?

- **Faster, more effective feedback.** Traditional marking cycles often take days. Learn Anything provides immediate, formative feedback. Research shows that AI-generated feedback improves the quality of student revisions, motivation, and even emotional engagement. See: <https://www.sciencedirect.com/science/article/pii/S2666920X23000784>
- **One-to-one personalised support.** Our platform adapts to each learner's needs, offering tailored explanations, hints, and marking — much like a private tutor. Intelligent tutoring systems have been shown to significantly boost student progress compared to conventional methods. https://link.springer.com/chapter/10.1007/978-3-030-52240-7_26
- **Better engagement and outcomes.** AI-enhanced feedback not only boosts academic performance, but also supports greater confidence and perseverance in students: <https://www.sciencedirect.com/science/article/pii/S0023969025000451>
- **Equity at scale.** While one-to-one human tutoring can lead to dramatic learning gains (famously described in Bloom's 2 Sigma Problem), it's

rarely feasible for most schools. AI tutoring brings many of those benefits to all students, affordably and efficiently:

Designed for Safe and Responsible Use

We've built Learn Anything with clear boundaries and robust safeguards:

- The AI **does not** engage in casual chat or off-topic discussion — it remains focused on learning.
- If a student attempts to misuse the platform (e.g. asking the AI to complete work dishonestly or engaging in inappropriate dialogue), the system **automatically alerts the teacher**.
- Teachers remain in full control, with visibility over student conversations and system-generated feedback. The platform is a learning assistant — not a black box.
- Students are able to use the system **independently**, so it's ideal for those who want to catch up or get some extra practice, with the full AI support and marking available.

We also believe that responsible AI use is a skill students must learn. Our system models how to use AI well: to reflect, improve, and deepen understanding — not to shortcut effort or bypass thinking.

Built to Empower Teachers and Learners

By automating repetitive marking tasks and providing intelligent, curriculum-aligned support, Learn Anything frees teachers to focus on what matters most: targeted intervention, creative instruction, and human connection.

We would be happy to discuss how Learn Anything can be deployed in your school or classroom — whether for a small pilot or a whole-school approach.

Yours faithfully,

The Learn Anything Team
